

# AT-HV-MU Series Fresh Air Make-Up Air Handlers

## Keep Air Inside the Vessel From Going Stale

The AT series of fresh-air make-up air handlers (AT-HV-MU) for chilled water systems duct in outside air, cool and dehumidify it, then re-heat it to room temperature and duct it to various interior spaces. Typically, crew cabins and other spaces two or more levels below deck will benefit from the use of these systems.

The specially-designed water coil cools and dehumidifies outside air in one pass. The coil, as well as the blower and all exposed sheet metal components, is coated to resist corrosion.

### Key Benefits

- Compact design.
- Corrosion-resistant coating on evaporator coil, blower, and drain pan.
- Patented.
- Drain pan has anti-slosh, anti-fungal foam lining.
- High-velocity (HV) fully-insulated blowers are rotatable.
- Integrated three-way bypass valve with easy-change power head.
- Electric heat with two-stage electric heat overload.
- Heater assembly accessible from the top or side.
- Large coil shroud volume for optimal performance.
- Brass hose barb loop-water connections.
- Electrical box can be remotely mounted up to 6 ft. (1.8 m).
- Remote air bleeder on 6 ft. (1.8 m) of flexible tubing with ball valve.
- Built-in flow control balances chilled water distribution.
